

MUHAMMAD WASEEM

CYBERSECURITY & AI · GKS UNDERGRADUATE APPLICANT 2027

muhammad.waseem.study1@gmail.com | github.com/Muhammadwaseem5131 |
linkedin.com/in/muhammad-waseem | Chishtian, Pakistan

PROFESSIONAL SUMMARY

Self-taught cybersecurity practitioner with a home security lab and four shipped security tools. Applied machine learning to vulnerability scanning, log anomaly detection, and code security auditing. Built end-to-end Python/FastAPI/React applications with documented results and open-source code. Seeking a B.Sc. in Smart Security at Konyang University to gain structured training in AI-driven defense that self-study cannot provide.

CORE STRENGTHS

Vulnerability Scanning	Anomaly Detection	Log Analysis	Incident Response	
Machine Learning	Generative AI	Python	FastAPI	React
Network Security	MITRE ATT&CK	Linux		

PROJECT EXPERIENCE

OmniAudit — AI-Assisted Code Security Auditor

Creator & Developer

Local-first tool that scans code with Bandit and uses Gemini AI to classify vulnerabilities. Python 3.10, FastAPI, React 19.

- Built an end-to-end security auditor that separates real vulnerabilities from false alarms using AI scoring.
- Designed a local-first architecture — code never leaves the user's machine unless they opt in.
- Integrated Google ADK, MCP protocol, and OSV database for comprehensive vulnerability coverage.

IoT-Sentinel — Network Scanner for IoT Devices

Creator & Developer

Scans networks, identifies IoT devices, and checks firmware against CVE databases. Python 3.12, FastAPI, React, SQLite.

- Developed automated IoT device discovery and vulnerability assessment across local networks.
- Achieved 67 passing tests with documented false-positive analysis for transparency.
- Implemented plain-language risk reporting so non-technical users can understand findings.

ScanMesh — Security Tool Orchestrator

Creator & Developer

Chains five scanners (nmap, ZAP, sqlmap, tshark) into one deterministic pipeline. No AI — 100% rule-based.

command.

- **Validated** with CI on every push — ZAP suspects SQL injection, sqlmap confirms, ScanMesh merges into one critical finding.

LogMind — Security Log Anomaly Detector

Creator & Developer

Detects anomalies in security logs with MITRE ATT&CK mapping and live monitoring. Python stdlib only.

- **Achieved** 1.00 recall on 55 attack logs and macro F1 score of 0.89 across all detector categories.
- **Built** ten pure-function detectors with zero external dependencies — runs offline with no installs.
- **Documented** all 15 false positives with explanations, demonstrating honest evaluation over inflated claims.

GEF Head Office Network — Enterprise Network Design

Network Designer

Full enterprise network simulation for Ghazali Education Foundation in Cisco Packet Tracer 9.0.

- **Designed** 9-VLAN architecture with ASA 5505 firewall, inter-VLAN routing, and multi-ISP redundancy.
- **Configured** ACLs, port security, Rapid PVST+, DHCP/DNS servers in an isolated DMZ.
- **Achieved** full connectivity across all VLANs and through the firewall — all tests passing.

EDUCATION

High School

Chishtian, Pakistan

TECHNICAL SKILLS

Security

- Vulnerability scanning
- Network defense
- Log analysis
- Incident response

AI & Machine Learning

- Anomaly detection
- scikit-learn
- Generative AI
- Model evaluation

Development

- Python
- FastAPI & React
- Linux & networking
- Data structures

CERTIFICATIONS

Google Cybersecurity Certificate

Google · Coursera

Data Structure & Analysis 1 & 2

KAIST · Prof. Moon, Il-Chul

Generative AI for Cybersecurity

IBM · Coursera · 3 courses

COMMUNITY & VOLUNTEER EXPERIENCE

Flood Relief Operations — District Bahawalnagar

Aug – Oct 2025

Alkhidmat Foundation Pakistan. Distributed ration packages, registered displaced families, and maintained beneficiary records across relief camps for 6 weeks.

IT & Computer Science Instructor

2025

Ghazali Education Foundation. Trained 50+ students in computer fundamentals, Office suite, and internet literacy.

Thalassemia Patient Support — Blood Donor Drives

Ongoing

Patient Welfare Society Chishtian. Campus coordinator organizing high-school student donors.

World Orphan Day Event

Feb 2026

Ghazali Education Foundation. Volunteer organizer.

Education in Emergencies — Global Course

Apr 2026

UNICEF Agora. Completed global course on education in crisis and emergency contexts.

Pakistan National Youth Foundation

Active member

PNYC — Project of LUMS. Youth empowerment, leadership, and UN SDG initiatives.

LANGUAGES

Urdu — Native · **English** — Proficient · **Korean** — Beginner (TOPIK 3 target by 2028) · **Punjabi** — Native
